SET-200 Rack Sotto Multi-Starter Set Contents of Set

[Base Unit Details]

Specifications

Base unit	Materials: Polypropylene ABS, aluminum alloy Size: 750×500×300(h) mm (during use), 750×500×60(h) mm (during storage) Weight: 2.5kg
Cushion	Materials: Polyester (outer material), nylon, urethane foam (padding) Size: 500×750×70(h) mm Weight: 1kg
Backrest	Materials: Polyester canvas, aluminum alloy, plywood, polyethylene, polyacetal Size: 600×250×35(h) mm Weight: 1kg

Safety Precautions: Please read thoroughly before use in order to use safely and avoid expected accidents.

DANGER: Indicates actions from which life-threatening, major accidents are clearly expected.

- When transporting the main unit by vehicle as a storage shelf
 - Put the unit into the storage shelf / transportation state as instructed in the “Method of Use” section.
 - Ensure that it does not obstruct the rear window or side windows.
 - Ensure that the main unit and its contents do not fall out of the vehicle while the vehicle is moving.
 - Keep multiple units unstacked and level if driving on bumpy roads. Otherwise, they may become damaged or tip over.
 - Besides these instructions, also observe all traffic laws.
- Other dangers
 - If you are using this product in combination with any separately sold accessories, thoroughly read the instruction manual for each item first.

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- The plastic part of this product may deteriorate due to ultraviolet light, be damaged by strong impact, etc. Inspect for cracks, partially whitened areas, and other abnormalities prior to use. If you discover any abnormalities, discontinue use.
- The maximum load of this product is 130kg per base unit (when used as a sofa, cot, or chair). When used as a storage shelf, do not stack more than 3 units, and do not exceed a maximum load of 20kg per base unit.
- If a large load is placed on the base unit (plastic part) when the unit is being used on a carpet or other floor surface on which the legs can easily slip, the unit may be damaged and tip over. After setting up the base unit, gently move it back and forth with both hands. If the surface is slippery, do not use the unit there.
- This product’s plastic part and fabric are not flame-retardant. Be careful when using near lanterns, burners, fires, and other high-temperature objects which may cause deformation or fire.
- Do not attempt to modify this product. Doing so may decrease its strength or durability, impairing its functionality.
- There are edges on parts of the back of the base unit. Be careful not to injure your hands.

CAUTION: Indicates actions which may lead to injury, damage to this product, or damage to other items.

- When using this product, select a sturdy, flat area that is not bumpy or sloped.
- When using this product as a sofa or chair, sit such that your back is in contact with the backrest.
- When using this product as a cot, there are no legs on the ends of the seating surface (backrests). Placing weight on one end can cause the other end to fly up or damage the backrest. Do not sit or place weight on either end of the cot, where you would rest your head or feet. (Refer to the “Cot” subsection in the “Method of Use” section)
- When used as a cot, this product is for single-person use only.
- Take care not to let your fingers, etc. get pinched during assembly. After you finish assembling it, press the seat and backrest with your hand to ensure that it is securely assembled before sitting on it.
- Do not impact or aggressively rock this product, as doing so can cause deformation or damage. In particular, ensure that you sit down slowly so as not to place a large burden on the low seat.
- Always keep an eye on small children sitting on this product. Standing on the seat, facing backwards, and rocking are particularly dangerous. The backrest could accidentally come off, or the unit could fall over. Only adults should assemble this product.
- This product is not intended for permanent use.
- This product may scratch or damage certain types of flooring.
- Store in a location with little humidity and good ventilation. If stored when wet, mildew, unusual odor, or color transfer from the outer material can occur. Remove any grime and moisture from the product and allow to sufficiently dry before storage.
- Do not move connected base units. If you are changing locations, separate the base units first. (Refer to the “Base unit: Connection” subsection in the “Method of Use” section)
- When transporting a base unit, ensure that it does not accidentally touch people or other objects (walls, vehicles, etc.).
- The cushion fabric, plastic parts, and backrest may become discolored due to ultraviolet light, friction, water, etc. Please note that leaving the unit outdoors may result in deterioration or discoloration of fabric and plastic parts.
- If the fabric of the cushion or backrest has water or sweat on it, color transfer to other objects can occur. Please handle with care.
- Please take care when wearing accessories and other sharp objects while sitting on the cushion as these may tear or puncture the fabric.
- The color of the cushion fabric may run when washed. Please wash separately.

Base Unit: Assembly

Base unit: Attaching the Velcro tape

There are two strips of Velcro tape for each base unit. Attach them as shown in the diagram below.

Base unit: Assembly

After removing the safety belts, push down on the legs from the top of the base unit to release them from the leg clasps. Slowly lift the main unit, which will cause the legs to extend. Once the legs have extended, reattach the safety belts as shown in the diagram below.

If the elastic cords are weak and assembly does not go smoothly, remove the handle and lift it to extend the legs.

Remove the safety belts

Push down on the legs, which are visible from

(1) Slowly lift the main unit

(2) The legs will extend

(3) Attach the safety belts (both sides)

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Be sure to attach the safety belts.
- After assembly, always ensure that the leg connections are firmly inserted into the leg connection holes.
- If you quickly lift the main unit the legs may accidentally swing towards you. Also, take care not to let your hands and fingers get pinched.

Multi-Starter Set: Method of Use

Backrest: Pipe assembly

Insert the two backrest pipes into the backrest.

Secure the assembly by hooking the elastic cords on the backrest around the fastening buttons on the pipes.

Base unit: Connection

To connect multiple base units together, slide the handles as shown in the diagram below, and secure them in the “LOCK” position. Ensure that the numbers on the surfaces of the base units all read “105°” (or 115°).

Lift the handles and elastic cord connectors, and slide them towards the neighboring base unit. Insert them into the “LOCK” depression, as shown in the diagram to the left.

⚠ WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- If you release the handle while sliding it, it may forcefully spring back due to the force of the elastic cords.

⚠ CAUTION: Indicates actions which may lead to injury, damage to this product, or damage to other items.

- Do not move connected base units. Placing unnecessary force on the plastic parts of the base units can damage them.

Sofa

After connecting three base units together, fold over the backrests as shown in the diagram below, and insert them into the base units. Place the cushions on top.

<Schematic>

Note!

If you insert the backrests with the numbers on the surfaces of the base units reading "105°", the backrests will be at an angle of 105°. Likewise for 115°. Please assemble at the angle you desire.

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Before sitting, ensure that the legs and backrest pipes are firmly inserted into the tops of the base units (plastic parts).
- Do not sit in such a way that your body places any excessive load on the backrests.

Cot

After connecting three base units together, fold over two backrests as shown in the diagram below, and insert them into the base units. Place the cushions on top.

⚠ WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- For single-person use only.
- When using this product as a cot, there are no legs on the ends of the seating surface (backrests). Placing weight on one end can cause the other end to fly up or damage the backrest. Do not sit on either end of the cot, where you would rest your head or feet.
- If you configure this product with one backrest raised, sit such that your lower back is in contact with the backrest, as with the sofa/chair configurations.
- If you configure this product with one backrest raised, ensure that the base units are connected. If they are not, there is a risk that the product could tip over during use.
- If you configure this product with one backrest raised up, ensure that the backrest pipes are firmly inserted into the top of the base unit (plastic part) before placing any body weight onto the backrest.

Chair

After assembling one base unit, fold over one backrest as shown in the diagram below, and insert it into the base unit. Place one cushion on the seat surface, and attach the other as a backrest as shown in the diagram below.

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Before sitting, ensure that the legs and backrest pipes are firmly inserted into the top of the base unit (plastic part).
- Do not sit in such a way that your body places any excessive load on the backrest.

Table

The base unit can be used as a table by combining it with two Wood Table W Bamboo units (CK-126T, sold separately).

[Installing the CK-126T Wood Table W Bamboo units]

(1) Hook the elastic cords over the corners of the table surfaces

(2) Line up the edges of the table surfaces

(3) Slowly lower

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Take care not to let your hands, fingers, etc. get pinched during assembly.
- Do not use Wood Table W Bamboo units (CK-126T, sold separately) that are extremely warped. They could slip accidentally, causing objects on the table to fall off, etc.
- Do not place any sources of fire on the table.

Multi-Function Table Bamboo Series: Connection

Base units can be connected to a Multi-Function Table Bamboo (CK-116T, sold separately), Multi-Function Table Long Bamboo (CK-117T, sold separately), Multi-Function Table Corner L Bamboo (CK-118T, sold separately), and Multi-Function Table Corner R Bamboo CK-119T, sold separately).

*Please use either the Iron Grill Table 300 Leg Set (CK-109, sold separately) or the IGT2WAY Leg Short Set (CK-109, sold separately) set to 300mm for the legs on the Multi-Function Table Series.

⚠ WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Thoroughly read the instruction manual for each item being used in combination first.
- Do not place more than 30kg on the tabletop of a Multi-Function Table Series Table. Do not sit on a Multi-Function Table Series Table. Doing so may damage the connectors, causing it to tip over.

Storage shelf

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Do not stack more than 3 units, and do not exceed a maximum load of 20kg per base unit.
- Install in a flat, sufficiently spacious, safe area. An earthquake or other external factor could cause the product to tip over, which could lead to injury or property damage.

Storage shelf: Transportation by vehicle

When transporting by vehicle, attach four backrest pipes. Stack the remaining base units as shown in the diagram below, or transport them individually.

DANGER: Indicates actions from which life-threatening, major accidents are clearly expected.

- Ensure that this product does not obstruct the rear window or side windows.
- Ensure that the main unit and its contents do not fall out of the vehicle while the vehicle is moving.
- Keep multiple units unstacked and level if driving on bumpy roads. Otherwise, they may become damaged or tip over.
- Besides these instructions, also observe all traffic laws.

WARNING: Indicates conditions which may lead to death or injury of the user if the product is mishandled.

- Stacked base units can accidentally tip over. Be sure to attach all four backrest pipes.

Inspection and Care

- If the elastic cords have deteriorated or are stretched out, please request replacement (paid) from our User Service department.
- After use, thoroughly wipe off any grime, moisture, etc. and store in a well-ventilated, shady area.
- Clean plastic parts and aluminum parts with a cloth soaked in a diluted neutral detergent, and wipe off the detergent with a cloth soaked in water. Then wipe with a dry cloth, and allow to dry naturally in a shady area.
- When washing the cushions, remove the urethane inside and wash only the fabric, placing it in a laundry net.
- The backrests contain a wooden core, so they cannot be washed in a washing machine. If they are dirty, wipe with a cloth that has been soaked with water and then wrung out, and allow to dry naturally in a shady area.

Quality Assurance

In the unlikely event that any product you have purchased is defective, please contact the store where you purchased it, our company, or the address noted on the individual product. If it is a manufacturing defect, the product will be repaired or replaced free of charge. In other cases, the product will be repaired for a reasonable price. Whether a product will be repaired or replaced will be determined at our discretion. The product may not be guaranteed or repaired in the following cases.

1. The product was not used as per the instructions manual.
2. The product's life span has been reached due to the aging of its materials.
3. The product was damaged by modification or rough handling.
4. The product was damaged by an unforeseen accident.
5. The product was damaged by something other than a manufacturing defect.
6. The product was damaged by dirt or rust.
7. A malfunction or breakage occurred due to disassembly.
8. A malfunction occurred due to part deformation or breakage caused by dropping or other impact.
9. The deterioration, breakage, or damage of a consumable part, or associated malfunction.
10. The product was damaged due to it being used in combination with another company's product.

Repairs

- Do not attempt to modify this product. Doing so may decrease its functionality or strength. Modified products will not be repaired.
- If serious repairs are required, please contact the store where you purchased this product or our User Service department.
- If you are asked to send the product for repairs, ensure that it is sufficiently dry and clean before sending it.
- Freight and repair expenses will be handled as follows.
 1. If subject to compensation: Our company will bear the round-trip freight expenses and repair expenses.
 2. If not subject to compensation: The customer will bear the round-trip freight expenses and repair expenses.
